# Lithium-ion Battery Case for iPhone 4
## Quick Start Guide

**Aluratek**

APC01B

1. Micro USB Port
2. 100% capacity remaining
3. 75% capacity remaining
4. 50% capacity remaining
5. 25% capacity remaining
6. Power Button

**Installation:** Please refer to the product case for instructions

**Charging:** No need to take the iPhone out of the case. Simply use the included Micro USB cable and plug into any USB port on your computer or the orginal iPhone power adapter (not included).

The LED's located on the bottom of the device will blink when charging. The capacity is shown by the number of LED's.

When the case is powered on, the iPhone is charging and/or using the power from the case battery. If the iPhone is drained of power, the case will first charge your iPhone. If the iPhone is fully charged, the battery will drain from the case battery first before using the iPhone battery.

To check the battery status, press the button located on the bottom of the case. Four LED's means the case is fully charged, and one LED means it is almost empty.

If you need further assistance, please contact the Aluratek support department for troubleshooting prior to returning this device.
